

ProNurse®

specialty milk replacer

Eliminate the Worry.

If a baby animal loses its mother, the last thing you should worry about is where its next meal will come from. In the case of an emergency, don't be caught without the nutrition your young animals require. Be sure to have ProNurse® Specialty Milk Replacer on hand before your baby animals are born.

ProNurse® Specialty Milk Replacer provides balanced nutrition for orphan animals of many different species. Species-specific products are always best (see list below*), however ProNurse® Specialty Milk Replacer provides essential nutrients when species-specific products are unavailable. The product is formulated to provide optimum digestibility and foundation nutrients – helping provide nutrients that are essential in early development. This formulation gives your newborns the start they deserve.

ProNurse® Specialty Milk Replacer provides balanced nutrition for multiple animal species, including: calves, foals, goat kids, lambs, piglets, llama and alpaca crias, fawns and elk calves, with:

- A formulation made with a balance of highly digestible proteins, fats and carbohydrates.
- Fortification of 26 essential vitamins and minerals.
- Easy mixing through LAND O LAKES® Instantizing Process.
- Maintained freshness within a convenient and resealable ziplock pouch.

*Species-specific options include: Cow's Match® WarmFront® and ColdFront® calf milk replacers, Doe's Match® kid milk replacer, Mare's Match® foal milk replacer and Ultra Fresh® Optimum lamb milk replacer.
