

Mazuri® Ostrich Breeder

Formula Code - 5586

Description

A pelleted feed designed for breeding ostriches and rheas, and is designed to be fed with a supplemental form of calcium such as oyster shell.

Features and Benefits

- Contains vitamins known to be required by birds - No supplementation necessary.
- Contains high levels of added vitamin E and selenium - Addresses deficiencies.
- Naturally preserved with mixed tocopherols - No ethoxyquin in formulation.

Product Form

Pellet size: 5/32" diameter x 1/2" length.

- 50 lb. net weight paper sack

Catalog

0001415

Guaranteed Analysis

Crude protein not less than	21%	Calcium not less than	1.65%
Crude fat not less than	2.5%	Calcium not more than	2.15%
Crude fiber not more than	11%	Phosphorus not less than	0.70%
Moisture not more than	12%	Sodium not more than	0.51%
Ash not more than	10%		

Ingredients

Dehulled soybean meal, ground corn, dehydrated alfalfa meal, ground soy hulls, wheat middlings, cane molasses, dicalcium phosphate, calcium carbonate, calcium lignin sulfonate (pelleting agent), soybean oil, fish meal (menhaden), salt, yeast cultures, dl-methionine, choline chloride, mixed tocopherols (preservative, form of vitamin E; citric acid, rosemary extract), manganous oxide, dl-alpha tocopheryl acetate (source of vitamin E), zinc oxide, copper sulfate, niacin, ferrous carbonate, manganese proteinate, calcium pantothenate, vitamin B₁₂ supplement, thiamin mononitrate, riboflavin, menadione sodium bisulfite complex (vitamin K), zinc sulfate, zinc proteinate, vitamin A acetate, folic acid, pyridoxine hydrochloride, calcium iodate, copper proteinate, sodium selenite, cobalt carbonate, biotin, cholecalciferol (vitamin D₃).

Feeding Directions

- Ostrich: Feed free choice for very high producing birds (over 100 eggs per year), at least 4 lbs per bird per day during breeding season. This feed may also be provided to birds that do not have access to pasture or have access to poor quality pasture. Do not allow non-breeding birds to become overweight.
- Rhea & Cassowary: Feed free choice.
- Always transition to new diets slowly (gradual transition over a 10 day period).
- Supplement high producing birds with calcium (using oyster shell) based on the level of egg production during the breeding season.

Egg Production	Level of oyster shell added
0-30 eggs.....	No supplementation necessary
31-60 eggs.....	1%
61-90 eggs	2%
91-120 eggs	3%
121-150 eggs	4%

Storage Conditions

For best results, store contents of open bag in container with sealing lid. Store in a cool (75°F or colder), dry (approximately 50% RH) location. Use within 1 year of bag manufacturing.

¹ Based on the latest ingredient analysis information. Since nutrient composition of natural ingredients varies, analyses will vary accordingly.

² Calculated using data from domesticated poultry.
