Feeding Directions

- Feed free choice to non-breeding, mature, fully-feathered birds.
- Adult birds should eat approximately ¼ cup (17 g) per lb (0.45 kg) of body weight daily, but amounts will vary based on species, size, and activity level.
- To encourage natural feeding behavior, scatter food directly on the water, where it will float.
 - To prevent the diet from floating away, offer feed in a shallow trough of water.
- For added convenience, this diet may also be offered dry.
- It is always good practice to wash hands thoroughly after feeding and/or handling animals.
- This diet is not for human consumption.

Storage Conditions

For best results, reseal the bag between uses or store contents of open paper sack in container with sealing lid. Store in a cool (75°F/24°C or colder), dry (approximately 50% RH) location free from rodents and insects. Do not offer moldy or insect-infested feed to animals as it may result in illness, performance loss or death. Freezing will not harm the diet and may extend freshness. Use within 1 year of bag manufacturing or "Best if Used By" date.
