

Mazuri® Flamingo Breeder Diet

(Available at www.mazuri.com or through a Mazuri® retailer)

Formula Code - 5645

Description

Mazuri® Flamingo Breeder Diet can be fed as the staple diet to breeding flamingos, cranes and other crustacean eating birds. As the primary portion of the birds' daily food intake, it will maintain the birds' vibrant plumage color when fed according to feeding directions.

Features and Benefits

- **Floating diet** - Allows for feeding of bird in the water and prevents accumulation on the bottom of the feeding area, limiting water contamination and waste.
- **Sustainable fishmeal source used.**
- **Contains stabilized vitamin C** - Longer shelf life.
- **Nutritionally balanced** - Contains high levels of vitamins and fish proteins.
- **Contains canthaxanthin** - A pigment that maintains plumage color.

Product Form

Extruded pellet: ¼" diameter x ⅜" length.

- 50 lb. net weight paper sack

Ingredients

Dehydrated alfalfa meal, whole wheat, corn gluten meal, fish meal (menhaden), wheat flour, brewers dried yeast, porcine meat and bone meal, dehulled soybean meal, porcine animal fat preserved with BHA and citric acid, sodium sesquicarbonate, soybean oil, calcium carbonate, shrimp meal, l-lysine, dl-methionine, salt, monosodium glutamate, pyridoxine hydrochloride, spirulina algae meal (color), cholecalciferol (form of vitamin D₃), magnesium oxide, d-alpha tocopheryl acetate (form of vitamin E), canthaxanthin (color), folic acid, calcium iodate, vitamin A acetate, choline chloride, preserved with mixed tocopherols (form of vitamin E), l-ascorbyl-2-polyphosphate (stabilized vitamin C), biotin, rosemary extract, thiamine mononitrate, calcium pantothenate, riboflavin supplement, citric acid, vitamin B₁₂ supplement, manganous oxide, inositol, menadione sodium bisulfite complex (source of vitamin K), p-aminobenzoic acid, nicotinic acid, potassium chloride, zinc oxide, ferrous carbonate, copper sulfate, zinc sulfate, sodium selenite, cobalt carbonate.

Feeding Directions

Mazuri® Flamingo Breeder Diet can be fed as a major part of the birds' daily food intake during the breeding season (spring and summer months). The feed can be scattered directly on the water, where it will float, or it can be fed in a long, shallow trough, which will prevent the food from floating away from the birds. Adult birds will eat in the range of 150-200 grams/day, depending on species size.

The feed can be scattered directly in shallow water, or it can be fed in a long, shallow trough.

Storage Conditions

For best results, store contents of open bag in container with sealing lid. Store in a cool (75°F or colder), dry (approximately 50% RH) location. Use within 1 year of bag manufacturing.

¹ Based on the latest ingredient analysis information. Since nutrient composition of natural ingredients varies, analyses will vary accordingly.

² Calculated using data from domesticated poultry.
