

Mazuri® Herbivore Aquatic Gel Diet

(Available through a Mazuri® retailer)

Formula Code – 5Z93

Description

Mazuri® Herbivore Aquatic Gel Diet is designed for the feeding of herbivore type fish. It contains a generous level of carbohydrate and fiber for plant-eating fish. It is shipped as a powder which is designed to be made into a gel prior to feeding. For a lower starch diet, we suggest Mazuri® Aquatic Gel Diet for Herbivorous Fish.

Features and Benefits

- **Soft-moist texture of gel** - More palatable to fish which are difficult to feed.
- **Contains stabilized vitamin C** - Longer shelf life.
- **Contains all vitamins and trace minerals known to be required by fish.**
- **Contains pigmenting agents** - Will help pigment fish.

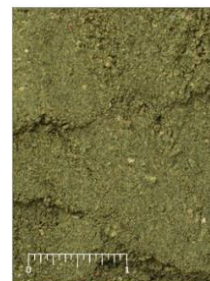

Product Form

Dry powder.

- Available by 1 kg

Guaranteed Analysis

Crude protein not less than	30.0%	Calcium not less than	2.0%
Crude fat not less than	3.0%	Calcium not more than	3.0%
Crude fiber not more than	7.0%	Phosphorus not less than	1.5%
Moisture not more than	12.0%	Sodium not more than	1.25%
Ash not more than	15.0%		

Ingredients

Ground corn, menhaden meal, gelatin, corn gluten meal, ground soybean hulls, shrimp meal, dehulled soybean meal, wheat germ, dicalcium phosphate, dehydrated alfalfa meal, salt, spirulina algae meal (color), betaine (hydrochloride or anhydrous), potassium chloride, wheat middlings, fish oil, soybean oil, xanthan gum, l-ascorbyl-2-polyphosphate (stabilized vitamin C), choline chloride, dl-methionine, l-tryptophan, nicotinic acid, inositol, calcium pantothenate, d-alpha tocopheryl acetate (form of vitamin E), ethoxyquin (a preservative), zinc oxide, tagetes (Aztec marigold) extract (color), ferrous sulfate, canthaxanthin (color), menadione sodium bisulfite complex (source of vitamin K), thiamine mononitrate, riboflavin supplement, pyridoxine hydrochloride, beta carotene, folic acid, vitamin a acetate, manganous oxide, ferrous carbonate, copper sulfate, zinc sulfate, calcium iodate, calcium carbonate, biotin, cobalt carbonate, cholecalciferol (form of vitamin D₃), vitamin B₁₂ supplement.

Feeding and Mixing Directions

- Mazuri® Herbivore Aquatic Gel Diet is designed to be an essential part of a total feeding system.
- Feed intake will vary based on age, body size and reproductive status.
- Prepared Mazuri® Herbivore Aquatic Gel Diet can be fed at a rate of up to 50% of the animals' diet to provide optimal nutrition. Never feed dry powder without first combining with water.
 1. Mix, by weight, 65% boiling (or at minimum 180°F) water to 35% Mazuri® Herbivore Aquatic Gel Diet. Adjust mixture to meet desired texture and need.
 - a. Do not microwave mixed product.
 2. Mix thoroughly with a spoon, fork or whisk for one minute, then pour into a shallow pan and allow to cool.
 3. Refrigerate until firm. Cut into pieces appropriately sized for the animals being fed.
 4. Feed to fish.

Storage Conditions

Mazuri® Gel Diets have a 1-year shelf life in the dry powder form when stored in a dry environment. For best results, tightly affix lid on canister after removal of desired dosage or store contents of open bag in container with sealing lid. Store in a cool (75°F or colder), dry (approximately 50% RH) location. The mixed product should be stored under refrigeration for no longer than 7 days or frozen for up to 1 month. It is recommended that frozen batches be individually sealed in amount of usage, as repeated entry into the container exposes gel to oxygen. Once this product is mixed with water to form a gel, it should be handled like raw fish.

¹ Based on the latest ingredient analysis information. Since nutrient composition of ingredients varies, analyses will vary accordingly.

² Calculated using 4 kcal/g carbohydrate, 9 kcal/g fat, 4 kcal/g protein.
